Education

Ghulam Ishaq Khan Institute of Engineering Sciences & Technology (GIKI) — Swabi, Pakistan
B.Sc. Data Science — Sept. 2024 – June 2028

Professional Experience

Najoomi — Islamabad, Pakistan
Artificial Intelligence Intern — July 2026 – Sep 2026

- Developing context-aware AI agents by transitioning stateless workflows toward persistent memory and session-aware architectures.
- Implementing Retrieval-Augmented Generation (RAG), memory layers, and user-context pipelines for conversational AI applications.
- Evaluated local and hosted LLM configurations on real conversation data, refined system prompts, and handled edge cases to improve response consistency.
- Researching Knowledge Graph integration for more reliable retrieval, contextual reasoning, and long-term agent memory.

PreMed.PK — Remote
Graphic Design Associate — May 2025 – Jan. 2026

- Led visual identity and high-fidelity asset creation for a medical education platform using Canva and Figma.
- Designed digital assets, educational content, and social media creatives aligned with the platform's visual identity.
- Streamlined design-to-delivery workflows by implementing reusable templates and standardized design systems.
- Supported social media campaigns and educational content while maintaining consistent visual branding across the platform.

Community Leadership & Ambassadorships

UROG, GIKI — *Marketing Director* — May 2026 – Present

- Leading marketing strategy and content planning for the Executive Council; previously served as Officer Education from Dec. 2025 – May 2026.

Canva — *GIKI Campus Ambassador* — June 2026 – Present

- Representing Canva at GIKI through campus initiatives focused on design, AI-powered creativity, workshops, and student upskilling.

Canva Community GIKI — *Community Lead* — June 2026 – Present

- Leading community workshops, creative campaigns, collaborations, and design-focused student initiatives at GIKI.

Replit — *Campus Ambassador* — May 2026 – Present

- Organized HackSummer in Islamabad, coordinating marketing, community outreach, mentors, judges, participant logistics, and partnerships.

atomcamp, GIKI — *Campus Ambassador* — Feb. 2026 – Present

- Promoting AI, data science, and automation learning opportunities across student communities through campus outreach and brand advocacy.

Google Developer Group on Campus, GIKI — *Core Team Member* — Nov. 2025 – Present

- Coordinated technical workshops, industry sessions, and developer community initiatives focused on AI and web development.

Microsoft Club, GIKI — *Outreach, Web Development & Marketing* — Dec. 2024 – Present

- Developed a custom research dashboard for ORIC GIKI to manage and visualize complex faculty research data.
- Led and supported creative marketing, community outreach, sponsorship coordination, and event promotion across club initiatives.

Research & Technical Projects

Knowledge Graph Research (Ongoing) — *Under Prof. Shahab Ansari*

- Collaborating with Zakarya Ahmad to research hallucination patterns in Knowledge Graph-augmented Multi-Hop Question Answering systems.
- Investigating structural and logical constraints to enhance factual consistency in LLM-based reasoning pipelines.

Skill Issue (2nd Place, Hack@GIKI AI Challenge) [GitHub]
- Developed a full-stack gamified learning platform using Next.js/Supabase to adapt content to user teaching styles.
- Engineered an Influencer Synthesis Engine that transforms academic text into viral-style explanations via custom LLM personas.
- Built a server-authoritative 1v1 Blitz multiplayer system using Supabase Realtime for race-condition-safe matchmaking.

Vyrothon (1st Place, Product Design)
- Engineered a high-fidelity interactive prototype at the National Science & Technology Park (NSTP).
- Conceptualized an "Immersive 3D Environment" featuring user presence and gamified storytelling interfaces.

CallPilot (Top 10, MIT Hack-Nation) [GitHub]
- Built an AI-driven voice automation platform for intelligent call handling, scheduling, conversational memory, and call management.
- Integrated React, Node/Express, Supabase, ElevenLabs, Gemini, and Google Sign-In to support voice AI and agentic workflows.
- Developed the end-to-end product independently during the hackathon, covering product design, frontend, backend, AI integration, and conversational memory.

EcoBite (Microsoft Imagine Cup) [GitHub]
- Designed an Azure-powered food redistribution platform utilizing AI Vision for freshness calculation and Maps API for real-time tracking.
- Developed workflows connecting NGOs, businesses, and individual donors for food donation and redistribution.
- Integrated Microsoft Entra ID to provide secure, role-based access for different platform stakeholders.

ChainTicket (3rd Place, BASE Web3 Nationwide Hackathon)
- Built a blockchain-powered event ticketing platform with QR-based verification to enable secure, fraud-resistant ticket validation.
- Implemented blockchain-based ticket verification to improve transparency and authenticity across the event ticketing workflow.
- Designed comprehensive organizer dashboards for tracking ticket sales, attendance, and event logistics.

Skills & Certifications

- **Programming & Data:** Python (Pandas, NumPy), SQL, C++, JavaScript, React, Next.js.
- **AI & ML:** AI Agents, Retrieval-Augmented Generation (RAG), Knowledge Graphs, Large Language Models (LLMs), Prompt Engineering, Agent Memory, NLP.
- **Cloud, Backend & Development:** Microsoft Azure, Supabase, Firebase, Node.js, Express.js, Git, GitHub.
- **AI & Development Tools:** ElevenLabs, Gemini, Replit, Lovable.
- **Design:** Figma, Canva, Affinity, Immersive UI, Storytelling-based UI, Wireframing, Prototyping.
- **Certifications:** Graphic Design Essentials (Canva), Canva Essentials (Canva), AI Skills for Students (Canva), AI in the Classroom (Canva), 5-Day AI Agents Intensive Course with Google (Kaggle), GitHub Foundations Part 1 & Part 2 (Microsoft), Introduction to Data Analysis with Excel (atomcamp), Intermediate SQL (DataCamp), Exploratory Data Analysis in SQL (DataCamp).
